EDUCATION

B.Tech in Computer Science & Engineering
Indraprastha Institute of Information Technology, Delhi

- CGPA: 8.08
- IIIT-D 2025

- - -

Senior Secondary Examination CBSE - Class XII
BHAVANS PUBLIC SCHOOL, DOHA, QATAR

- Percentage: 94.2%
- CBSE-2020-21

- - -

Higher Secondary Examination CBSE - Class X
BHAVANS PUBLIC SCHOOL, DOHA, QATAR

- Percentage: 96.2%
- CBSE-2018-19

POSITION OF RESPONSIBILITY

WebDev Team Member @ GDSC(Google Developer Student Club)
- Organized & Managed intra and inter college Tech Events.

Events-Team-Executive @ Salt N' Pepper food club
- Organized & Managed all events Activities.

TECHNICAL SKILLS

- **Programming Languages**: Java, C, C++, Python, JavaScript
- **Web Development**: HTML, CSS, JavaScript and Django
- **Machine Learning: worked with TensorFLow and PyTorch**
- **Data Structures & Algorithm**
- **Object Oriented Programming Operating Systems**
- **Computer Networks and Wireless Networks**
- **Database management and Sytems: MySql**
- **Tools and Technologies:** Figma, Bootstrap, VS Code, IntelliJ, MySQl Workbench, Oracle VirtualBox

ACHIEVEMENTS

- **5th in Subtask 1 CodaLab Competition for the SemEval-2024 Task3 (Textual Emotion-Cause Pair Extraction in Conversations).**
- **89.78% accuracy on Google Speech Command Dataset(using GMM)**
- **59.798 % on Human activity recognition dataset from UCL(using KNN)**
- **School Topper in 12th CBSE Board exam 2021-22**

INTERESTS AND HOBBIES

- **Learning about Finance and different Business model**
- **Development**
- **Stock Market**
- **Machine Learning and AI.**

PROJECTS

TECPEC: Textual Emotion-Cause Pair Extraction in Conversations
- This project addresses SemEval-2024 Task 3, Subtask 1 which focuses on extracting emotion-cause pairs from conversations.
- A two-step pipeline architecture is introduced to identify emotion-cause pairs.
- The first step involves emotion classification for the utterances using a novel architecture. This approach was compared with OpenAI's GPT 4.
- The second step utilizes a Question-Answer model to identify causes for the target utterance based on the identified emotions.
- The project ranked 5th in Subtask 1 CodaLab Competition for the SemEval-2024 Task3.

- - -

Online Retail Store
- A Django Web application deployed with the help of AWS.
- Made use of HTML, CSS, Javascript on front end.
- Allows user to create account, user-verification, password reset, shipping facilities.
- Paypal API for payment , cart functionality , track orders, shipping functionality .
- ⌂ parthivdholaria/OnlineRetailStore

- - -

Optical Character Recognition(OCR):
- Classification of alphabets from A-Z and digits 1-9.
- Accuracy of 99.4% on testing dataset.
- Model: Multi-stacked model on KNN, SVM, RandomForest.
- Performed EDA and other pre-processing techniques.
- ⌂ parthivdholaria/ML_Project_OCR

- - -

Tank Star Game
- Graphics designed using LIBGdX library from Java.
- Key Features: select tanks, Aim and Fire , control power and trajectory, movements, reset game, multiscreen.
- Implemented using OOPS.
- ⌂ parthivdholaria/AP-TankStars

- - -

Figma Prototype
- EduSort IOS mobile App: Allows students to manage their study in college.
- Key Features: See IMP updates, Assignments Due, Courses taken, chat service etc.
- High Fidelity prototype with added animations.
- ⌂ parthivdholaria/Figma-IHCI-Project

- - -

Custom Linux Shell:
- functionality:such as pwd , ls , cat , rm , mkdir , clear, date.
- Flags of these commands are also implemeted.
